Choose Water!

To find out if a drink contains added sugar, look for these words on the label:

- Sugar
- High Fructose Corn Syrup
- Cane Sugar
- Brown Sugar
- Invert Sugar
- Dextrose
- Maltose
- Malt Syrup
- Sucrose
- Lactose
- Honey
- Honey Syrup

To reduce the number and portion size of sugar-sweetened beverages (SSBs), drink only once in a while, 8 ounces or less.

Not a significant source of fat cal., sat. fat, trans fat, cholest., fiber, vitamin A, vitamin C, calcium and iron.

*Percent Daily Values (DV) are based on a 2,000 calorie diet.

INGREDIENTS:

CARBONATED WATER, HIGH FRUCTOSE CORN SYRUP, CITRIC ACID, NATURAL FLAVORS, SODIUM CITRATE, SODIUM BENZOATE (TO PROTECT TASTE).
Let’s Not Sugar-coat It!

Sugar-sweetened beverages (SSBs) are beverages with added sugar

- These drinks include soda pop, juice/fruit drinks, sweetened teas/coffees, flavored waters, chocolate milk, sports and energy drinks.
- A typical 20-ounce soda or juice/fruit drink contains 15–18 tsp. of sugar—as much as in three chocolate candy bars!

SSBs are bad for your teeth

- Drinking soda pop nearly doubles the risk of cavities in children. Further, the sugar in SSBs feeds the bacteria that produces acid, which attacks and dissolves tooth enamel.

SSBs increase the chance of becoming overweight or obese

- Drinking an 8-ounce SSB each day for a year is equal to 55,000 calories, or 15 pounds a year.
- Drinking one 12-ounce can of soda pop each day increases a child’s chances of becoming obese by 60 percent.

SSBs increase the risk of developing type 2 diabetes

- People who drink one or two cans of soda pop a day have a 26 percent greater risk of developing type 2 diabetes.

Limit juice—EAT your fruit!

Despite having more nutrients and containing only natural (not added) sugar, 100 percent fruit juice typically contains as much sugar and calories as soda pop.
You wouldn’t **EAT** 17 packets of **SUGAR**

why would you **DRINK** them?
Read the Label

To find out if a drink contains added sugar, look for these words on the label:

- Sugar
- High fructose corn syrup
- Corn sweetener/Corn syrup
- Dextrose
- Fruit juice concentrates
- Glucose
- Honey
- Invert sugar
- Molasses
- Sucrose
- Cane syrup/Cane sugar

</thead>
<tbody>
<tr>
<td>Newborns and Infants</td>
<td>0 tsp. (0g)</td>
</tr>
<tr>
<td>Toddlers and Preschoolers</td>
<td>4 tsp. (16g)</td>
</tr>
<tr>
<td>Children Ages 4–8</td>
<td>3 tsp. (12g)</td>
</tr>
<tr>
<td>Pre-teens and Teenagers</td>
<td>5–8 tsp. (20–32g)</td>
</tr>
<tr>
<td>Adult Women</td>
<td>6 tsp. (24g)</td>
</tr>
<tr>
<td>Adult Men</td>
<td>9 tsp. (36g)</td>
</tr>
</tbody>
</table>

Please note: All of these numbers are guidelines and based on averages and are not tailored to individual health needs. Please contact your physician for guidance about how consumption of added sugar may affect you, particularly if you or a family member have any pre-existing health conditions.
Choose water or milk  
(1% or nonfat for those older than 2)

Stock the fridge with a jug of cold water and bottled water for those on-the-go

For a treat once in a while:  
• Add zest to your water by adding a fresh fruit slice or cucumber slices and fresh mint  
• Freeze 100 percent fruit juice in an ice cube tray, and then add one frozen cube to a glass of water  
• Add a small splash of 100 percent fruit juice to plain water

Reduce the number and portion size of SSBs—drink only once in a while, 8 ounces or less
