Course Attendance and Registration
Each participant must personally check in at the beginning of each course to pick up his or her course packet. The University of Michigan is an ADA Continuing Education Recognition Program (CERP) recognized provider. Attendance is open to dentists and their allied dental personnel. Early registration is recommended.

Course Credits
This continuing education activity has been planned and implemented in accordance with the standards of the ADA CERP through joint efforts between the University of Michigan and the Delta Dental Foundation (DDF). The University of Michigan designates this activity for six continuing education credits.

How to Register
Please submit separate online registration and payment for each person attending.

Online: www.dent.umich.edu/cde to view course details, scroll down to: A156-17 and A157-17.

Once registration is complete, you will immediately receive a course confirmation via email. If you do not receive a confirmation, please call 734-763-5070 or 734-763-5171 to verify your registration.

The University of Michigan School of Dentistry is one of the nation’s leading dental schools engaged in oral health care education, research, patient care and community service. General dental care clinics and specialty clinics providing advanced treatment enable the school to offer dental services and programs to patients throughout Michigan. For more information about the School of Dentistry, visit us on the web at www.dent.umich.edu.

The University of Michigan is an ADA CERP recognized provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses of instruction, nor does it imply acceptance of credit hours by boards of dentistry.

### Using Modern Material Science and Technology to Enhance Restorative Success for Indirect Restorations

Advancements in dental material science have drastically improved adhesion, durability of restorations and esthetics. To ensure long-term clinical success, clinicians must properly prepare a treatment plan by championing both material selection and proper restorative design. This course will help to clear up confusion between popular opinion, research and technique. This full-day course is created to provide the tools for scientifically based selection of materials to predict and ensure clinical success of indirect restorations.

**Speaker**

Sabiha S. Bunek, DDS

Dr. Bunek is editor-in-chief of The Dental Advisor. She earned her doctor of dental surgery degree from the UMSoD, and she maintains a private practice in Ann Arbor, Michigan, focusing on esthetic and comprehensive restorative dentistry. Since 2002, Dr. Bunek has been actively involved with The Dental Advisor as a consultant, associate editor, contributing author, and currently as editor-in-chief. Her experience as a clinician and researcher helps provide an objective, evidence-based approach to clinical dentistry. She is a published author in several dental journals.

### Exploring Digital Dentistry: How CAD/CAM Technology is Changing Dental Practice

Digital technology for dental application is expanding and evolving at a rapid rate. This course will review the current digital technology for dental application and its clinical capability for efficient implementation in private practice. Hear about:

- Digital impression systems
- Chair-side CAD/CAM systems
- Material and treatment capabilities
- Current scientific evidence on clinical outcomes

**Speaker**

Dennis J. Fasbinder, DDS, ABGD

Dr. Fasbinder is a clinical professor in the Department of Cariology, Restorative Sciences and Endodontics, University of Michigan, School of Dentistry (UMSoD). He is board certified in general dentistry by the American Board of General Dentistry. He also maintains a part-time private practice in Ann Arbor, Michigan.

Dr. Fasbinder directs the Computerized Dentistry Unit at the UMSoD that is dedicated to research and education on CAD/CAM dental systems. The CompuDent Unit has been a leader in education and research with the chair-side CAD/CAM systems and digital impression systems since 1993, resulting in numerous publications. He is a frequent speaker on ceramic-based dentistry and digital dental systems at meetings and conferences in North America and international locations.

### Course Details

**Friday, June 2, 2017**

**Registration:** 7:30 a.m.  
**Course:** 8 a.m. to 3 p.m.  
**Credits:** 6 CDE  
**Cost:** $85 nonrefundable course fee. Fee includes boxed lunch. Please contact UM with dietary restrictions.  
**Location:** Amway Grand Plaza Hotel 187 Monroe Ave. NW Grand Rapids, MI 49503  
**Hotel reservations:** 616-774-2000
